## Boys & Girls Club of Yellowstone County

Five summer associates served from 2011 to 2013 focusing on the following initiatives:

- Summer Learning Curriculum including science, technology, engineering, art, and math programming
- Fund Development
- Mentor Programming

**QUICK FACTS:**

- Over \$1,000 generated
- 21 volunteers recruited & trained
- 31 new services

**“The VISTAs who served our organization this summer greatly impacted the lives of teens across the community.**

They worked at three of our Clubhouses to design and implement exciting S.T.E.A.M. (Science, Technology, Engineering, Art, Math) programming that introduced the teen members to experiential, hands-on learning. This gave our teen members a stronger sense of competence and facility in areas that many teens shy away from. A greatly successful project that required learning advanced math and engineering skills as well as giving them an avenue for artistic abilities.”

**Annie Hasiak, Director of Program Advancement**
