Contractors,

SUBJECT: Retain Radio Frequency Unit When Installing Siding

When demolishing and installing new siding on a residential or commercial property, please keep the City of Billings meter reading equipment that is attached to the side of the building (known as the RF, radio frequency – see photo below). Do not throw it away, nor cut the wire that is hooked to the unit. If the RF unit is missing or damaged due to the construction, the home or business owner will be responsible and will be charged to replace the device.

When the job is completed, please call 406-657-8315 or 406-657-8331 to schedule an appointment to have us remove and remount the existing RF unit. If you have any questions, please call me at 406-657-8331.

Thank you,

Marty Laib
Field Service Manager
